Das Space Launch System (SLS) ist die neueste Rakete der NASA und wurde zur Erforschung des Weltraums entwickelt. Das SLS gilt als die kraftvollste Rakete, die jemals gebaut wurde. Es hat bisher nur eine Mission startgetrieben: Artemis I, ein unbemannter Orbitalflug um den Mond. Artemis II, die erste bemannte Mission, soll 2024 starten und wird den Mond umrunden, bevor Artemis III 2027 die Menschheit wieder auf den Mond bringt. Inklusiv: Ständer zum Präsentieren des Modells. Inklusive 1 Absichtsbild-Schema.

Le Space Launch System (SLS) est le système de lancement spatial le plus puissant jamais conçu. Jusqu'à présent, une seule mission a été effectuée: Artemis I, qui était un vol sans équipage autour de la Lune. Artemis II, la première mission habillée, doit décoller en 2024 et elle transportera l'équipage de la Lune. Artemis III prévoit de ramener l'humanité sur la surface lunaire en 2027. Contenu inclus: 1 stand de présentation inclus.

Il Sistema di Lancamento Spaziale (SLS) è il veicolo più potente mai costruito. Ha finora lanciato solo una missione: Artemis I, un volo senza equipaggio intorno alla Luna. Artemis II, la prima missione con equipaggio, è prevista per il 2024 e prevede un'orbita intorno alla Luna. Artemis III prevede il ritorno dell'uomo sulla superficie lunare nel 2027. Supporto di esposizione incluso. 1 schema di costruzione incluso.

The Space Launch System (SLS) is NASA's latest rocket and is designed to enable deep space exploration. The SLS is considered to be the most powerful rocket ever manufactured. Only one mission has so far taken place: Artemis I, which was an uncrewed orbit around the moon. Artemis II, the first crewed mission, is due to launch in 2024 and will loop around the moon before Artemis III aims to return mankind back to the lunar surface in 2027. Display stand included. 1 Decal scheme included.

Het Space Launch System (SLS) is de nieuwste raket van NASA en is ontworpen om verkenning van de ruimte te mogelijk te maken. De SLS wordt beschouwd als de krachtigste raket die ooit is gebouwd. Tot nu toe heeft er slechts één missie plaatsgevonden: Artemis I, een onbemande vlucht in een baan om de maan. Artemis II, de eerste bemande missie, staat gepland voor 2024 en zal rond de maan cirkelen, waarna Artemis III in 2027 de mensheid weer naar het maanoppervlak wil brengen. Inclusief displaystand. 1 stickerschema meegeleverd.

Le Space Launch System (SLS) è l'ultima razza della NASA, progettata per consentire l'esplorazione dello spazio profondo. L'SLS è considerato il razzo più potente mai prodotto. Finora è stato impiegato per una sola missione: Artemis I, un'orbita senza equipaggio intorno alla Luna. Artemis II, la prima missione con equipaggio, è prevista per il 2024 e prevede un'orbita intorno alla Luna. Artemis III prevede il ritorno dell'uomo sulla superficie lunare nel 2027. Supporto per esposizione incluso. 1 set di decalcomanie incluso.
